

Week 7 AI Feature Demo Report

EcoStay Connect - AI API Integration

Name: Sheetal Saru

Project: EcoStay Connect

GitHub Repository: <https://github.com/S-s11ru/Ecostay-connect>

AI feature overview

EcoStay Connect includes an AI-powered EcoStay Assistant that recommends eco-friendly homestays based on location, budget, number of guests, and travel preferences.

User input screen

Destination: Rishikesh Budget: ₹2500 Guests: 2 Preference: Eco-friendly stay near nature

Loading state

The application displays a loading indicator while the AI processes the recommendation request.

AI recommendation output

Recommended EcoStay: Green Valley Homestay, Rishikesh. Estimated price: ₹2400 per night.
Why recommended: Solar-powered property, local food sourcing, rainwater harvesting, and proximity to nature trails.

API request summary

Method	Endpoint	Status
POST	/api/ai/recommend	200 OK

Prompt used

You are an AI travel assistant for EcoStay Connect. Recommend eco-friendly homestays based on location, budget, number of guests, and travel preferences. Explain why each recommendation is environmentally friendly.

Conclusion

The AI feature enhances EcoStay Connect by providing personalized eco-friendly accommodation recommendations and improving the user experience through intelligent travel assistance.
